Aspirin	81 mg	Once daily	Oral
Atorvastatin	20 mg	Once daily (evening)	Oral

Known Allergies

■ Penicillin (anaphylaxis), Sulfa drugs (rash)

Treatment Summary

Patient admitted for 3-day inpatient stay. Continuous cardiac monitoring performed — ECG normal, no acute ischemic changes. Blood glucose managed with insulin sliding scale. Echocardiogram showed normal LV function with EF 60%. Troponin levels negative x3. Patient stabilized and

discharged in good condition.

Discharge Instructions

1. Continue all home medications as prescribed above. 2. Follow a low-sodium (less than 2g/day), low-carbohydrate diet. 3. Restrict strenuous physical activity for 1 week. 4. Monitor blood pressure daily and maintain log. 5. Return to ER immediately if chest pain recurs or breathing worsens.

Follow-Up Appointment

Scheduled: September 27, 2024 — Dr. Sarah Johnson, Internal Medicine Clinic, Room 4B

Key Laboratory Findings

HbA1c: 8.2% (elevated — target <7%), Fasting glucose: 182 mg/dL, LDL: 118 mg/dL, Creatinine: 1.1 mg/dL (normal), eGFR: 74 mL/min/1.73m² (Stage 2 CKD — monitor), CBC: within normal limits. Troponin I: <0.04 ng/mL ×3 (negative).
